

CAVION, INC. RESEARCH FUNDING POLICY

Cavion is committed to promoting research that supports its efforts to transform lives through first-in-class therapies for neurology and oncology. Cavion provides funding for general research, translational research, other research or development projects related to its pipeline of clinical and preclinical technologies in Cavion therapeutic areas.

Cavion has a rolling review policy when evaluating funding requests for scientific project support. The scientific project should not have commenced prior to the approval for funding. In addition, the funding must not be used for capital campaigns, infrastructure costs, or overhead related to but not limited to, facilities and equipment. Funding may include support for salaries and direct costs related to the scientific project and a percentage of administrative overhead (not to exceed 30% of the direct costs of the scientific project).
